Assignment 1: Summary of app idea

Description:

I will create an app called first-project. It will be a blog with recipes, created by authors (users). Every recipe needs an author, can be published (or not) and has multiple ingredients in a certain quantity. The title is "Healthy recipes".

Naming of the relations:

User-Recipe is a 1-N relationship

- A User **hasMany** recipes

- A Recipe **belongsTo** an author (user)

Recipe-Ingredient is a 1-N relationship

- A Recipe **hasMany** ingredients

- An Ingredient **belongsTo** a recipe

Models and their properties:
